

This map displays the geographical layout of Douglas County, SD, used for administrative purposes such as FSAI verification and tract code reviews. Key elements include:

- Geographic Features:** Major roads (e.g., Highway 89, Highway 16), water bodies (Lake Andrus, Lake Oakes), and various townships and cities.
- Administrative Divisions:** Tracts are delineated by colored boundaries (yellow, orange, purple, green). Specific areas are labeled with codes like "DAVISON 035", "DOUGLAS 043", and "HUTCHINSON 067".
- Infrastructure:** Railroads (Burlington, Great Northern) and other transportation routes are shown.
- Landmarks:** Notable locations such as New Holland, Huron, Corsica, Armour, Delmont, and Raymer are identified.

Where state and county, and/or MCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

State and county names are followed by their FIPS code.

- 1 MCDs are symbolized and labeled only in the 12 strong MCD states: Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, North Dakota, South Carolina, and Wisconsin.
- 2 Incorporated place name color corresponds to the incorporated place fill color.
- 3 The full census tract code consists of six digits with an implied decimal point between the fourth and fifth digits. For legibility on this map, the leading zero of the decimal part of the code is omitted. For example, to translate a census tract number on the map to its full code, add a zero after the first digit to the left side of the number to reach six total digits and remove the decimal point between the last two digits.

Example: Census tract number on the map "33.07" represents census tract code 003307.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

The plotted map scale is 1:57,126
